### **Description**

Our Organic Mediterranean Sea salt is extracted by hand on the Croatian coast according to an ancient tradition. Far away from industry and big cities, the small seawater saltworks of Nin cover an area of 55 hectares in a shallow lagoon. The extraction of the sea salt is a natural and ecological production, the saltworks a biodynamic ecosystem, embedded between five nature parks. Using only muscle power, sun and wind, the salt farmers harvest about 3,000 - 4,000 tonnes of sea salt every year during the summer months. The marketing of these sea salts is an important contribution to the preservation of this unique coastal landscape, which provides a habitat for many animal and plant species. The mildly salty Niner sea salt is a gift of nature and the ideal universal salt for daily use.

### **Important note**

Our Organic Mediterranean Sea salt is a natural product. Natural variations in colour, grain size and chemical composition are normal and do not constitute a reduction in quality.
